When opening older projects which use sounds from Omnisphere 1 Aug 25, 2010 There aren't all that many things like omnisphere.. I'm wondering if someone can recommend any synths or virtual instruments that can do the whole ' lush,dreamy soundscape' thing that omnisphere is so good at (As was it's predecessor atmosphere).. 8th June 2011Lives for gearHey guys,Apologies if this post isn't in the correct forum.. I'm using logic at present and currently don't own any synths or instruments so I've been making my own ambient sounds using my guitar and some delays and reverbs which has worked ok but after a few songs it starts to get a bit samey sounding so I'm looking into the possibility of trying out some synths that can do something similar but with a bit of variation.. Unfortunately Omnisphere is just out of my budget at the moment so I can't go down that avenue.. Alternative A Omnisphere ProAll existing projects will now load in Omnisphere 2, with the original Omnisphere becoming just a distant memory! Alternatives Omnisphere 2 has a sound of its own, but there are other means of getting similar results from other software instruments. e828bfe731 [Akkamahadevi Vachanas In Kannada Pdf](#)
