This game is great! hours of fun is there. Ok, so I have only played through the first few free runs and a few of the head to heads.....so far.

The camera is a bit on the wonky side, sometimes it will turn when you want it to, sometimes it wont. Is it the worst game that you could spend \$7 on, no, absolutely not, there is definitely some enjoy ability to it. There's some hit detection to be fixed, I hope, but theirs hope for this yet. With not many other games for you to play like this out there right now, you don't have many other choices. I made a video for my YT channel of what I have played so far, so if you are interested in the game, watch the video first to see the game for its glory AND flaws!

<https://youtu.be/4uQvsk2GIKU>. absolutely garbage. my little brother bought it and now it is plaguing my library.. awesome game ..... if your playing on a nokia 3310 !. I cannot recommend this game in any way. you should only buy this if it's on sale for like 0.99. maybe not even then.

[The controls are terrible. you would think you are playing a mobile game. basicly just press spacebar and do a trick. thats all there is to it. The graphics don't help either.](#)

[I'm an idiot. turns out this is actually just a mobile game and worst part is that it is free on android.](#)

[So in short, if you want to pay for a free mobile game that controls and looks terrible. doesn't give you the freedom to move like you want and is glitchy af then go for this. I am currently waiting for my refund.. I really enjoyed the game. It is like an old Free Running. Playing modes are cool, especially challenge with a rival. It was hard, but finally i passed it\) Waiting for new characters, modes and locations!. Terrible game. plays like a 0.99 mobile port.](#)
