This game is game nice game, would play game more times for more fun game.. I was highly upset to find that the TITLE music is not part of the soundtrack! Main reason for buying said OST. I am finding that maybe more than just the Title Screen\Select Screens tracks are missing. If you're going to sell an OST you should include ALL the games tracks. The songs included in this 17 track OST are indeed very nice, but that's not the point i'm trying to make here.

This review used to be a Negative one. If you're wanting the opening\title screen music you have to use this link

[It's pay what you want, and should have the three\(3\) missing tracks. I went ahead and supported this mini-OST bundle also. Love the music, just a bit annoyed at having to buy two seperate OSTs.. They came back from the dead and are now fixing the game.. Boring, small "world". I loved it 10\10 great graphic the lore is great. Buggy mess. You'll have the feel that you're playing an alpha the whole game. Not even worth it for the nostalgia value. Keep away from it.. Barely recommend- for like \\$5. No plot, just some neat visuals and puzzles. Puzzles are weird and stupid sometimes, puzzles are a hard thing to balance between too easy and too hard, and straight up ♥♥♥♥♥♥t. It's oaky.](#)

The game is fun and challenging without being frustrating. I recommend it. There is nothing that I disliked.. If this would be free to play, it would still be overpriced.. The voice acting is totally cringy. Item combinations are sometimes so vague and far fetched it required resorting to external resources to figure it out. And I couldn't find myself caring for the story much either. A shame because other Daedalic point and click games have been excellent.. I'm playing this on a brand-new Dell XPS15 with 16GB ram , and the game still crashes regularly. Some of the hidden object scenes are... weird. I play games like this one a lot, but this one may be the most confusing I've encountered. I'm not sure if I want to recommend it. Since I have to give it a thumbs up or down though I'll still give it a yes, hoping the crashes will get fixed.. This game gave me the power to defeat my greatest enemies 10V10

There will be very fancy and cute achivements. Hope you will like it.

Also i am looking to make a pause button.

I am glad that there is a lot of players who have nostalgia feelings about this game also. But the empty feeling is too hard inside, and im thinking to add some music on background.
